# About

Project77 is a public, fully decentralized cryptocurrency deployed on Base mainnet (Chain ID 8453). Token deployer is not the owner of the token contract. Token contract does not have the owner, is not upgradeable and has no functions that would benefit some individuals for example, buy/sell taxes, mint, recovery, blackmail, freeze, transfer without approval, stop of transfers. All 77 millions tokens were minted at Token Generation Event (later "TGE"). In early stage the token relies on people who are committed to serve it's mission and help fulfill roadmap's milestones. There are 2 roles main caretaker and caretakers. Main caretaker is guard of token reserve and its mission, remaining caretakers serve purpose of providing structure for Project77 token ecosystem such as website, smart contracts. They also manage social channels and are the ones making investments to obtain funds for token burns.

Initial main caretaker is token deployer, initial caretakers are core contributors.

In Q1 of 2030 there will be a voting of token holders that will decide who is next main caretaker and who are next caretakers. Rules and details that will ensure that voting is fair and transparent are TBA.

## Mission

Purpose of Project77 is simple a token that is heading to ultimate zero supply.

Caretakers\* can achieve that thanks to minimization of operational cost being less than 100\$ per year for whole Project77 ecosystem, including but not limited to smart contracts, graphics, websites, promoting campaigns, website hosting, domains, socials. These costs are fully paid by private caretakers funds ensuring that there is no need to sell tokens for operational purpose.

All funds raised via token sales or obtained by providing liquidity will be used in lending protocols and to make investments providing in a long run funds for constant buybacks and burn until there are no tokens left on the market. Details about used protocols and investments made by caretaker will be announced when funds used in this manner will exceed 100.000\$.

Caretakers are not liable for third-party risks such as protocol hacks, exchange bankruptcy or investments being non profitable because they are the owner of it in exchange buyers obtained tokens Project77.

## Tokenomics

Tokenomics is one of the most important factors while looking before making investment in cryptocurrency, we made sure that our tokenomics represents something what we would invest in. Both 100% unlocks for airdrop and presale showing confidence in project, no irrational allocations, no giving millions of tokens for CEX exchanges so they can dump them the next second they received them and no referrals in airdrop and presale making it fair for everyone. Simplified version of tokenomics in graph can be found at home page.

## Allocations (Total 77 millions tokens):

- Reserve 27m (approx. 35.06%) cliff 3 years\*\*\*.

Usage of reserve will be determined by main caretaker chosen in voting in 2030, until then it remains locked in smart contract.

- Liquidity 9m (approx. 11.69%) TGE 100%\*\*

Liquidity allocation allows caretakers to provide liquidity on exchanges.

- Presale 9m (approx. 11.69%) TGE 100%\*\*

Presale allows caretakers to obtain capital for investments that will allow burnings, unsold tokens will be burned.

- Airdrop 9m (approx. 11.69%) TGE 100%\*\*

Airdrop serves purpose as a big thank you for early supporters, more than 10% of total supply and 100% TGE shows that we respect those who support .

- Launchpads/Private 9m (approx. 11.69%) TBD

This is allocation to acquire additional funds for investments.

- Future incentives 5m (approx. 6.49%) cliff 1 year\*\*\*

This allocation will be used but not limited to future airdrops, staking rewards, burning, community campaigns.

- Marketing 5m (approx. 6.49%) 100% TGE\*\*

This allocation will be solely used for marketing purposes such as paid campaigns, airdrops, burning.

- Core Contributors 4m (approx. 5.19%) 100% TGE\*\*

This allocation is for early contributors that allowed this project to happen in the first place, smallest allocation yet huge amount of great job done by them.

## Airdrop

Participating in airdrop is free, participating in airdrop campaigns does not guarantee receiving airdrop, Caretakers reserve the right to filter out sibils, spam accounts and will put requirements that will be announced after initial airdrop campaigns ended.

# Presale

Purchased tokens in presale are not refundable, in exchange of funds you obtain Project 77 tokens meaning the caretakers have full rights over the funds. Token bought in presale will be airdropped to buyer wallet, there is no option to change designated wallet. Tokens are being sold at 269.500\$ FDV making one Project77 token worth approx. 0,0035\$. Tokens can be bought in exchange of USDC on Base mainnet. Tokens bought in presale will be rounded down. For example if you bought 1100.80, 1100 tokens will be airdropped.

# Roadmap

## Q3 2025+

Start of building website, making social accounts, discord server and testing smart contracts of token, presale, claim, airdrop and lock.

## Q2 2026

Launch of website, airdrop and presale are live, token deployed on blockchain.

## Q1 2027

Airdrop claiming, burning starts, listing, presale tokens airdropped, start of providing benefits for token holders, start of 3 years cliff for reserve tokens.

## Q1 2030+

Reducing total supply to less than 25m tokens (excluding reserve). Voting for next caretakers, future is in their hands.

# Addresses

Token contract: 0x60Cd0c438EbEe7736af69E0d2C902e9892548E82

Presale contract: 0x80f104c0275B9726b78DB4D329104Cfb2947B1d5

Claim contract: TBA

Lock contract: TBA

Reserve wallet: TBA

Wallet providing liquidity: TBA

Wallet with presale and sales tokens: TBA

Future incentives wallet: TBA

Marketing wallet: TBA

# Disclaimer

This litepaper is subject to change without prior notice. This document is for informational purposes only and does not constitute investment, financial, legal or tax advice.

\*Mission is subject to change if new caretakers chosen in voting in 2030 decided to change project mission from initial one.

\*100% TGE refers to time between TGE and Listing, meaning if there is allocation with 100% TGE their beneficiaries will be able to receive/claim tokens before listing.

\*\*\*Cliffs will start after listing.
